DETAILED ACTION

Allowable Subject Matter

Claims 1-9,11,13-22 are allowed.

The following is an examiner's statement of reasons for allowance: with respect to claims 1 and 18, in the environment of an in-tank fuel level data network comprising data-origin party with an on-premise data communicator having means to cyclically poll at least one on-premise automatic tank gauge (ATG) controller and pre-programmed with cyclic schedule and stores locally in its memory at least several cycles worth of polled data. With respect to claim 13, a network comprising, an on-premise data communicator having means to cyclically poll at least one on-premise automatic tank gauge (ATG) controller and pre-programmed with cyclic schedule and stores locally in its memory at least several cycles worth of polled data and the data message contains a historical record of the polled data of at least the current cycle. The closest prior art Carr et al '689 teaches a communicator (i.e. a control center) which services a plurality of sites. A server carries out polling of the sites. Carr et al '689 fails to teach or suggest a communicator located at each site, cyclically polls the ATG controller and stores several cycles' worth of polled data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is Finley et al '448 who recite fuel-dispensing system.
